

Study programme: CHEMICAL ENGINEERING
Module: OIL-PETROCHEMICAL ENGINEERING

No.	Subject Name	Semester	Classes				ECTS
			Lecture	Exercises	Laboratory	SRW	
1.	Engineering Statistics	1	3	3	0	0	6
2. 3.	Election Block 1 (two of the five)	1	3	0	3	0	7
	Industrial Information Systems						
	Residue and heavy oil processing						
	Sustainable Development and Energy Efficiency						
	Production and Application of Hydrogen, Substitute Natural Gas, and Liquid Petroleum Gas						
	Simulation and Control in Petroleum Industry						
4.	Study Research Work	1	0	0	0	20	10
5.	Election Block 2	2	3	0	3	0	7
	Monitoring and Analysis of Energy Consumption						
	Cogeneration Plants and Ecological Aspects of Their Application						
	Monomers and Polycondensation Components						
6.	Practice	2					3
7.	Preparation and Defense of the Master Thesis	2					20
