2. Brief description of the project

Challenge Labs is a two-week innovation design marathon, organized by [EIT Food](#) (European Institute of Innovation and Technology), during which participants develop concepts for products or services that address current challenges in the agri-food industry. With the help of facilitators and experts, interdisciplinary teams go through the steps of #DesignThinking. Throughout the workshop, participants work together on a concept, which they then transform into a prototype and present as part of a presentation to a jury of the most prominent industry experts.
